

Biosafety Cabinet Certification North Carolina

As part of the Bloodborne Pathogens Standard (29 CFR 1910.1030(e)(2) (iii)(B) biosafety cabinets (BSCs) must be certified when installed, whenever they are moved, and at least annually.

Please view the [OSHA FactSheet on Laboratory Safety Biosafety Cabinets \(BSCs\)](#) .

We have compiled this list of companies in North Carolina that perform BSC certifications to serve as a starting point for laboratories that need to have this service performed. This is not a comprehensive list of all possible certifiers in the area.

The North Carolina State Lab of Public Health does not recommend or endorse any particular certifier or company.
